## Bi-Level-R<sup>®</sup>

If your space is brighter than necessary for your uses, turn off some of the lights and save energy.

- Save Energy, inexpensively
- Bi-Level-R is a 3 wire device that connects to any existing fixtures
- This is NOT dimming, We are only turning off fixtures that are not needed for most uses of the space
- Leave lights off unless they are needed
- Establish Bi-Level Lighting to qualify for the Tax Deduction offered by EPAct 2005
- No NEW wiring required
- No new power wiring or control wiring
- Use the existing wall switch to activate the lights that do not come on the first time you turn on the lights
- Establish light levels and energy costs based on your budget and your uses of the space
- Control your own savings
- Do NOT sacrifice the light levels that might be needed for special uses of the space

To save energy and cut your electric bill by 20%. Now you can install a Bi-Level-R switch, on half of the fixtures in a room

Turn on ONLY the lights you need. Establish the light levels you can afford and that you need. The fixtures can be activated if the light is needed.

**5 year Warranty**  
**UL Listed, Patented, Made in USA.**
