Bi-Level-R

To comply with the requirements of EPAAct 2005, here is a new product that allows you to have two levels of light in a space without rewiring.

In a typical office with a door, one light switch and 2 fixtures, the Bi-Level-R is able to turn on the 2nd fixture with a flick of the switch.

When you install Bi-Level-R units on the feed line to the fixture it will provide 2 levels of lighting.

The Bi-Level-R is a 4" x 6" x 2" steel box that has a chase nipple that connects to an existing box on the existing wiring. There are 3 wires, black, white and blue, that connect to the existing wiring with wire nuts. No new wires are required.

UL Listed, Patented, Made in USA.
