Energy Savings - Bi-Level-R

In a room with nine fixtures, install 4 of the Energy Savings - Bi-Level-R modules (blue fixtures) on the feed lines to the 4 fixtures as shown. This 'checker-board' pattern provides an acceptable pattern of illumination. It complies with the requirements calling for bi-level lighting controls.

The Bi-Level-R is a 4" x 6" x 2" steel box that has a chase nipple that connects to an existing box on the existing wiring. There are 3 wires, black, white and blue, that connect to the existing wiring with wire nuts. No new wires are required.

UL Listed, Patented, Made in USA.
